

CAMU-CAMU POWDERS

The highest natural source of Vit. C

ABRAZIL
INGREDIENTS FOR HEALTH

Myrciaria dubia, commonly known as camu camu, is a small bushy riverside tree from the Amazon rainforest in Peru and Brazil, which grows to a height of 3-5 m (9.8-16.4 ft) and bears a red/purple cherry-like fruit incredibly rich in vitamin C.

The amount of vitamin C content in the Camu-camu begins to diminish as the fruit reaches maturity, which is when the top flavors emerge. Therefore, harvesters have to forge a delicate balance between flavor and nutritional benefits, which is why some people prefer slightly less ripened Camu-camu fruits.

Our experience and infrastructure are crucial assurance that your source processes the best raw material produced in our state-of-the-art manufacturing processors to consistently delivers high-quality ingredients.

Product	Scientific Name
Camu-Camu 2:1 Spray-Dried Powder	<i>Myrciaria dubia</i>
Camu-Camu 4:1 Spray-Dried Powder	<i>Myrciaria dubia</i>
Camu-Camu 21 Vit.C Spray-Dried Powder (Fortified)	<i>Myrciaria dubia</i>
Organic Camu Camu Product	Scientific Name
Organic Camu-Camu 2:1 Spray-Dried Powder	<i>Myrciaria dubia</i>
Organic Camu-Camu 4:1 Spray-Dried Powder	<i>Myrciaria dubia</i>
Organic Camu-Camu Freeze-Dried Powder	<i>Myrciaria dubia</i>

PACKAGING Spray-dried: food-grade polyliner 20-25kg/fiber drum | **Freeze-dried:** Aluminum bag 10kg/box
