

JABUTICABA POWDERS

Brazil's Antioxidant-Rich Superfruit

Jabuticaba (jah-boo-tih-KAH-bah) is a deep-purple Brazilian superfruit known for its rich natural color and high polyphenol content—especially in the peel, where its antioxidant power is most concentrated. Often compared to a grape or dark berry, it offers a sweet, slightly tart flavor and a strong nutritional profile driven by anthocyanins and other beneficial plant compounds. Widely used in juices, powders, and extracts, jabuticaba brings vibrant natural coloration, functional value, and a compelling premium “superfruit” story to wellness, beverage, and nutrition applications. From responsible sourcing to finished ingredient formats, jabuticaba represents the next generation of clean-label, naturally derived superfruits for modern product innovation.

Product	Scientific Name
Jabuticaba 4:1 (whole fruit extract)	<i>Plinia cauliflora</i>
